Figure 2.29: NYS County Percentage Change in Hispanic Pop., 1990-2009

Source: Center for Disease Control, Race and Ethnicity dataset

Figure 2.30: Relative size of Hispanic population, Upstate New York Counties, by metro status, 2010

Source: U.S. Census, 2010

The map in Figure 2.30 provides information on the actual relative size of the Hispanic population in Upstate NY counties, and indicates the metropolitan status of each county as well. This map helps to distinguish between percentage change in a population, and proportion of the total population comprised of a particular group, in this case, the Hispanic population of Upstate New York.

Related to both international migration and the Hispanic population increases, is the percent of the population that is foreign born. Almost 16% of New York State residents were foreign born in 1990, and this figure increased to 21.3% towards the end of the 2000's. In contrast, only 5.8% of Upstate New York's population is foreign born.

Figure 2.31: Percentage Foreign Born, New York State County Types, 1990, 2000, & 2005-2009

	% Foreign Born in New York State		
	1990	2000	2005-2009
New York	15.9	20.4	21.3
Upstate	4.3	4.9	5.8
Metropolitan	4.8	5.5	6.5
Micropolitan	2.6	2.5	2.9
Non Core	3.3	3.8	4.2
